

PORTABLE FOG CANNON (5 Metres)

OUTDOOR COOLING
AT LOW COST

FEATURES

This is a low cost fog generating module trajecting fog at a distance of 5 to 7m with dense fog. Large Critical mass of fine fog generated through our Ruby Insert Fog Nozzles traject high velocity. Self contained with 41 liter water container, driven by single phase electric motor discharging 8 liter/min @100bar through seamless stainless steel tubing with seven (7) qty of R-50 Fog Nozzles inter-connected by compression fittings.

5 metre Fog Cannon consist of ;

- A) High Pressure Pump - 1 pc
Flow rate : 8.0 liter/min @ 100 bar
Supply : 230VAC, 1 phase, 50 Hz,
power : 2hp, 1450 rpm
Pump head : Brass alloy
c/w stroke adjuster, pressure gauge,
- B) Stainless steel compression tubes
and fittings - 1 lot
- C) 41 liters plastic water container c/w
with inlet strainer and drain valve - 1 lot
- D) Model R-50 Fog Nozzles c/w pp filter
in 316 stainless steel material in its
entirety with 0.5 mm orifice diameter - 7 pcs

For dust suppression at construction sites, incineration plants, wood dust coalesce, marble dust etc. It is portable and for easy plug in to single power supply

Easy to install!
