

# CENTRIFUGE MISTING FAN

OUTDOOR COOLING  
AT LOW COST

## OPERATION

Water is drawn to the Centrifuge unit aided by a small aquarium pump in the water container.

As the centrifuge unit spins rapidly, it atomises the water into fine mist.

HW-26 includes an 26 inch oscillating fan with 3 speeds control. It is totally Self Contained. Environmental Friendly and silent during operation with no need of high pressure pump, no nozzle, no filtration and fittings.

## CHARACTERISTICS

- Mist system : Centrifuge Vortex
- Water tank : 41 liters plastic tank
- Mist Period : 6 hours
- Mist drop size : < 30µm
- Available area : 30 cubic meter
- Throw distance : 10m @ highest knob
- Fan diameter : 25 inch (650mm)
- Fan speed : 3 adjustable speed
- Fan spread : 90 degrees Lateral
- Fan Height : 1.78 m

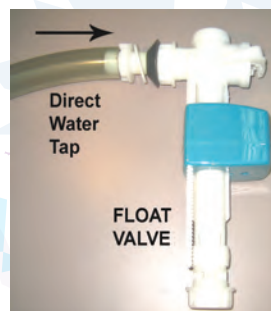

Back panel switch

**JUST PLUG IN  
& CHILL**

## OPTIONAL

Float valve for direct connection to water tap to ensure continuous water supply to container without manual filling. Option at adder cost.

**Model : HW-26**

## SPECIFICATIONS

- Voltage (VAC) : 220-240
- Freq(Hz) : 50/60
- Power(Watt) : 260
- Speed(RPM) : 1080-1400
- Airflow (m3/h) : 8280
- Noise(dB) : 53-69
- Remark : 3 speeds
